INTERNSHIP

Front-end Developer at Sketchish   2021

- I have done my Internship of Three months as a front-end developer at Sketchish where I learned technologies like react js, javascript, mongoDb

React Developer

TNM Software Solution | Ahmedabad   2022-2023

- I have hands-on experience in react developing highly interactive web applications utilizing JavaScript, React, and Material UI, and Good experience in customizing bootstrap and integrating Restful APIs and core knowledge of GraphQL

- Worked as a front-end developer from March 2022 to the present, we have a product-based company the app I worked on is Flare Safety- where I have integrated chat support, Live tracking MAP, and Communication between portals.

Project:

1. Created a Messenger App, an application using React, Firebase & Material-UI also deploying a React app with FirebaseHosting uses Server-less cloud functions to process each of the messages sent with a Real-time database with firebases Firestore.

2. Build React Todo List App. I mainly use React hooks, so useEffect, useState, and useRef. You will be able to add Events, Remove Events, Edit, and Mark & Finish Complete/cross out the to-do items.

3. Build Amazon Clone E-commerce Functionality using React. firebase for authentication, Database, Functions, and Hosting. I will also be using HTML, CSS, and React Context API.
